

Maintenance Instructions for Fescue Lawns after Seeding

Watering Instructions

Day 1 - Day 10 - watering should be done twice a day for a period of 10 to 20 minutes to maintain moisture.

Day 11 - Day 21 - watering should be done 3 times a week for a period of 30 minutes.

After day 21 - water only twice a week for a period of 45 minutes to an hour. This will give the lawn a good soaking and also allow for it to dry.

Adjust watering time according to the amount of rainfall.
